

CLAIMS

We claim:

1 1. A method of displaying multiple images on a display system, said
2 method comprising:
3 determining a size of an image display area;
4 selecting a first set of images from an image collection such that said first set of
5 images will fit within said image display area along with a first specified
6 minimum amount of space between images, an extra amount of space being
7 generated by subtracting a width of said first set of images and said minimum
8 amount of space from said size of said image display area; and
9 displaying said first set of images in a row by placing specified minimum amount
10 of space between images and said extra amount of space divided evenly
11 between said first set of images.

1 2. The method as claimed in claim 1 wherein image collection
2 comprises an ordered set of images.

1 3. The method as claimed in claim 1, said method further comprising:
2 placing a second specified minimum amount of space between subsequent rows.

1 4. A method of organizing digital images, said method comprising:
2 acquiring a first set of digital images during a first single session; and
3 marking said first set of digital images during said first single session as related
4 images.

1 5. The method of organizing digital images as set forth in claim 4,
2 said method further comprising:
3 displaying said first set of images as being from a single film roll.

1 6. The method of organizing digital images as set forth in claim 4,
2 said method further comprising:
3 acquiring a second set of digital images during a subsequent second session; and
4 marking said second set of digital images during said second session as related.

1 7. The method of organizing digital images as set forth in claim 4
2 wherein marking said first set of digital images comprises giving said first set of digital
3 images a same creation date and time.

1 8. A method of organizing digital images, said method comprising:
2 selecting at least one image displayed in an image display area;

3 selecting a keyword button from a keyword button area; and
4 marking said at least one image with a keyword associated with said keyword
5 button .

1 9. The method as claimed in claim 8 further comprising:
2 displaying said selected keyword in said image display area.

1 10. The method of organizing digital images as set forth in claim 9
2 wherein said keyword is displayed on said at least one image.
